

Ultrasound-Guided *Injection Therapy*

SportsMed Subiaco sports doctors now offer injection therapy using ultrasound-guided technology.

Ultrasound-guided injections

On-site ultrasound-guided injection therapy will provide immediate results at the time of consultation.

- Injection administered by experienced sports physicians
- Ultrasound guided injections for musculoskeletal conditions including joint, bursal and tendon pain/pathology
- Injection types include:
Cortisone, PRP, Autologous blood & Viscosupplementation (Synvisc, Durolane)
- Prompt treatment at the time of consultation if appropriate
- Patient assessment and treatment streamlined reducing the need for multiple appointments for patients
